PROFESSIONAL EXPERIENCE

Software Engineer | PayPal (via client engagement) | Oct 2025–Present

- Develop and maintain backend services and GraphQL APIs using TypeScript and Node.js.
- Design GraphQL schemas and optimize queries and data-fetching patterns to improve service efficiency.
- Collaborate with cross-functional teams on API integrations, maintainability, and production readiness.

Full Stack Developer | AB InBev | Feb 2025–Oct 2025

- Developed GraphQL APIs with NestJS and web applications with Next.js.
- Designed SQL Server data access and contributed to Azure DevOps CI/CD pipelines and automated testing.
- Integrated Azure AI Services into application workflows and developed REST/GraphQL services.

Full Stack Developer | Serasa | Sep 2024–Mar 2025

- Built Node.js/NestJS APIs and AWS serverless integrations using Lambda, SQS, SNS, Step Functions, and API Gateway.
- Developed Jest unit and end-to-end tests for GraphQL APIs and asynchronous workflows.
- Worked on concurrency, service integration, and containerized deployment with Docker.

Tech Lead / Backend Developer / Frontend Developer | Trocafone | Mar 2021–Jul 2024

- Progressed from frontend development to backend engineering and technical leadership.
- Led development of five projects spanning NestJS/Node.js, PHP/Laravel, React/Next.js, and GraphQL/REST APIs.
- Led modernization of legacy PHP services into Python/FastAPI and .NET Core microservices.
- Built GraphQL APIs with PostgreSQL, Redis caching, AWS services, and CI/CD automation.

Full Stack Developer | Domy | Jul 2024–Mar 2025

- Developed .NET Core and Node.js/NestJS backend services and REST APIs.
- Contributed to AWS-based microservices and Docker/Kubernetes deployments.

Junior Frontend Developer | Agência Art Seven | Sep 2020–Mar 2021

- Built responsive websites, landing pages, and e-commerce interfaces with JavaScript, React, PHP, and WordPress.

Software Development Intern | Ingenico | Apr 2018–Apr 2020

- Maintained internal systems and worked on payment terminal customization, troubleshooting, and technical documentation.

SELECTED PROJECTS

Monolith modernization — Trocafone. Led migration of a legacy PHP monolith toward services using Node.js, FastAPI, and .NET Core; implemented GraphQL gateways and containerized workloads.

Real-time monitoring dashboard — Trocafone. Built live dashboards with GraphQL subscriptions, Redis caching, PostgreSQL optimization, and CloudWatch monitoring.

EDUCATION

B.Sc. in Computer Science — Universidade São Judas Tadeu | 2018–2022

SELECTED TRAINING

Software Architecture Fundamentals (Full Cycle, 2025) | SOLID Express (Full Cycle, 2025) | Continuous Integration (Full Cycle, 2024)
